

COMPANY PROFILE

WHO ARE WE

We are an independent private company head-quartered in Kolkata, India undertaking tank calibration, inspection, UST, tank and terminal survey, certification (through independent and various international governmental metrological departments and 3rd party inspection agencies), ultrasonic testing, tank settlement and tilt survey. The concept to calibrate tanks was conceptualized in 1987 by Late Tomojit Ghosh (1935 to 1995). He was a chemical engineer from Jadavpur University, Kolkata, along with a Master degree and held expertise in the field of metallurgy, inspection and survey.

OUR VISION

Since then we have grown across India and been spreading across international boundaries to extend our quality services to all types of organizations - big or small. Half of Iraq's oil exports go through our inventory system is a proof big enough of our capabilities. But no job is considered a small job. We get involved in all small things. We are motivated to climb higher in today's competitive contemporary industrial arena. Carrying on the concept and legacy and led from the forefront by Prosenjit Ghosh, AMIE, an engineer with an experience of 25 years and providing unique technical and mathematical innovation, we are committed to provide not only volumetric accuracy but complete survey solutions to our clients at competitive rates - both pan India and internationally. Our global footprint is a proof to our realizing TGC to make it a globally competitive and executable organization with quality and pricing backed up by a strong team.

OUR EDGE

We are now a consortium of efficient, responsive and experienced engineers with on-field technical expertise combined with CAD-modeled mathematical volume analysis. We certainly have the edge with constant technological innovation and upgradation - meeting international standards and solving intricate problems. LASER AND OPTICAL BASED TECHNIQUES LIKE OPTICAL TRIANGULATION, ELECTRO OPTICAL DISTANCE RANGING, OPTICAL REFERENCE LINE HAD BEEN PERFECTLY IMPEMENTED BY US EVEN BEFORE OUR INDUSTRY PEERS THOUGHT BEYOND TRADITIONAL METHODS OF TANK CALIBRATION.

OUR COMMITMENT

We are committed to provide you with high quality services. We are accredited from BSI (UK) with ISO 9001:2008 QMS for our services and maintain rigorous quality control and audit at all stages of workflow - ensuring 100% customer satisfaction and commitment to post sales followup. We are pursuing constant upgradation of uneven and irregular surface data manipulation like 3D laser surface scanning to help industry achieve accurate volumes.

OUR FOCUS

To make the tank owner understand the extreme importance of accurate volumes. Tank Calibration and survey helps the owner of the tank to get a thorough feedback about inventory, leading to mixing accuracy linked to product quality and tank health, which if wrongly executed or left unchecked may prove costly and disastrous. A thorough understanding of any tank characteristic has earned us the reputation of a first hand solution provider in the industry - in India and worldwide.

OUR MAJOR SERVICES APART FROM TANK CALIBRATION ARE ULTRASONIC THICKNESS TEST OF PIPELINES IN TERMINALS, P& I DIAGRAMS WITH VALVES NOMENCLATURE, INSTRUMENTS, FIRE HYDRANT LAYOUTS WITH ALL SAFETY EQUIPMENTS AND OTHER LAYOUTS ON AUTOCAD AND TERMINAL SURVEYS., – ALL IN-HOUSE.

VERY IMPORTANT IS TANK SETTLEMENT TESTING, OVALITY CHECKING, TILT TEST, TANK FLOOR SCANNING WHICH WE SPECIALIZE.

CLIENTS IN OIL AND GAS, POWER, SHIPPING (INDIA)

1. Indian Oil Corporation (Refinery, Pipelines, Marketing)
2. Bharat Petroleum Corporation
3. Hindustan Petroleum Corporation
4. GAIL
